RESEARCH PLAN SUPERVISOR REVIEW FORM

Aspect	Not required by research method	Complied	Partially complied	Not complied
Accurate presentation of research topic				
Research plan in terms of formal criteria				
Its volume is minimum 7 typewritten pages, not exceeding 15 pages, minimum 13.000 characters				
Proposition of the research plan				
The objective(s) identified in the research plan				
The hypotheses (concerning formulation, can be researched and compliance with the objectives)				
Number of the referenced, quality works is minimum 15				
The source selection not out of proportion: no periodicals are overrepresented, does not contain disproportionately too many curriculum and online sources				
There are 5 Hungarian publications among the sources				
There are 5 international publications among the sources				
Statistical findings demonstration of at least 5 publications has been fulfilled				
Exact identification of method of the planned research has been fulfilled				
Place and date of the research has been identified				
Identification of the target group				
Identification of sampling method				

Specific presentation of the sampling process				
Presentation of the sample inclusion and exclusion criteria				
Estimation of sample size				
Presentation of sub-sample and control group				
Presentation of items from other sources with referencing (in case there was no borrowing, declaration of it)				
Aspect	Not required by research method	Complied	Partially complied	Not complied
Accurate identification of the applicable statistical methods				
Identification of the dependent and independent variables				
Identification of the applicable IT software(s)				
Presentation of the expected results, integrity with the hypotheses and the objective				
Accurate character of the bibliography				
The bibliography has been compiled according to the regulations				
The references are complete and accurate				

FINAL CONCLUSION:

The proposition intended to be research is significant and up-to-date, the chosen topic can be profoundly researched. The scientific literature forms a theoretical context in which the research topic can be adequately positioned, the specific research is worth to be conducted within the domain intended to be researched, and concerning on the sampling, research resources and statistical methods substantial research can be performed.

yes

no

Based on the review the approval of the research plan is

proposed

not proposed.

If there is „not complied” classification within the aspects, the research plan cannot be approved! If three or more „partially complied” classification is there, the research plan also cannot be approved! If it is proven that part or whole of the research plan is not the individual work of the student, the research plan cannot be approved!
